## ARI Slick Gallery within an article

Hi

I've placed the ARI Slick Gallery within an article but it overlays the text that is in the article. Is there any way to stop this from happening or can you not have both within an article?

Cheers

Hello,

It can be a problem with site template styles. Provide link to a page where we can see the problem.

Add the next CSS rule to a site template CSS file:

```
body .primary p
{
  float: none;
}
```
