I have downloaded ARI Slick Gallery, but what do I do with it to make it work.

The demo looks fantastic.....

I want to put gallery images into an article in Joomla 1.5

Hello,

Install the module and configure it. You can find documentation in "Description" field on module settings page.

Like I said, probably very stupid, but that helps to set up the parameters, but does not help you use it within an article, or am I missing something here.....

You can use "Content - Load Module" standard Joomla! plugin to load a module into an article. More information about it can be found [here](#).

Slowly getting there. I now have a series of 'blank' thumbnails, which I can click to get a picture.

I cannot see any thumbnails, just an outline.

It seems you use incorrect value for "Thumbnails path" parameter. Leave this parameter empty if you want to use auto-generated thumbnails.

Like this

edit - sorry picture upload not worked

Changed the parameter as suggested and no difference.

Could you provide temporary access to your J! backend by email so we could investigate the issue?

The extension can't generate thumbnails automatically because a PHP graphic extension is not installed on your server (for example GD or ImageMagick). Contact your hosting support and ask to install a PHP graphic extension or generate thumbnails manually and use "Thumbnails path" path parameter to specify path to thumbnails.

I have created a thumbnails folder and entered the path to it. Still no thumbnails showing on my page.

I have tried various different variations, but still no joy.

Clicking on my 'blank' thumbnail brings up my main picture correctly.

In what folder thumbnails are located? Do they have the same name as original images?

The folder is TempThumb and files have the same names.

I have left the temporary access switched on if you want to go and have a look.

Try now please. Incorrect value was used for "Thumbnails path" parameter.

That is looking very good now. Thank you very much.

As a hought, it may be worth while revising the wording for the thumbnail path help text, as it was confusing.

Will now spend some time tidying up my pictures.
