## Joomla Core and RoxBox lightbox no arrows

Posted by sled - 2011/10/27 14:33

---

Both the Joomla core and Roxbox lightboxes do not have arrows to move forward or backwards through the photos. That means users have to close each photo and click to open another photo from the stack. How come the arrows are not showing up to cycle through all the photos without having to close each and every photo?

Here is the page -->

<http://www.pwclassic.com.php5-21.websitetestlink.com/index.php/photo-gallery>

THanks for the help

Hello,

"ARI Sexy Lightbox", "ARI Colorbox", "ARI Pretty Photo" and "ARI Fancybox" supports navigation between images into a lightbox.

Regards,  
ARI Soft
