
description from arislickgallery.ini as item title

Posted by Dominator7 - 2011/11/08 23:43

As you can see at the link provided, when you hover on an item, the description I put on arislickgallery.ini appears like the item (or picture) title. I do not want that!

I have put simplecaddy's code with {} in the description to make the items be able to be put in the basket and it works like a charm, but I really need to delete the code in arislickgallery (or pretty photo that I have purchased and use) that puts the description like a picture title.

Thanks anyone that can help me!

Hello,

Download and upgrade "ARI Slick Gallery" module. New version contains "Hide tooltips" parameter, set it to "Yes".

Regards,
ARI Soft
