ARI Slick Gallery + Ninja Shadowbox
Posted by pimpslap - 2011/12/16 16:32

_____

I am attempting to use Ninja Shadowbox as the lightbox integration module for ARI Slick Gallery, but I can't seem to get it to work. I've downloaded the latest versions of both modules. Installed the ARI Slick Gallery first and got it configured and working. The I downloaded Ninja Shadowbox and configured it to be enabled and include itself on all pages. However, when I load the gallery page, I get the error:

ARI Slick Gallery: "System - Ninja Shadowbox" plugin isn't installed.

Any help would be appreciated.

Adam
