problems inserting ARI Slick Gallery into a table
Posted by wyncrg69 - 2012/02/08 15:03
_____

Hi,

I am having a problem inserting ARI Slick Gallery into a table in Joomla 1.7.

i am trying to make a simple 1 row + 2 columns table.
(left hand column:text, right hand column: ARI Soft slick gallery module.)

Without the module inserted into the table the layout of the text on the front end is correct and appears to be what i am seeing in the content box in administrator.

However, when the module is inserted into the right hand column of the table the text appears down the very left of the cell with the module making up the rest of the page. No matter what properties i attribute to each cell the layout on the front end is always the same.

Any suggestions how to overcome this would be greatly appreciated.

Thanks

Wayne

Hello,

Provide a link to a page where we can see described problem.

Regards,
ARI Soft

Hi,

thanks for the quick response.

i was just about to write another post saying that i found the problem.
i needed to change the module width on the module page. i have been fighting with this problem for hours, when lets face it, i should have looked at this in the first place!!!!!!

problem solved!

thanks again, and thanks again again for the great module.

wayne
