No pictures views in the gallery

Posted by jerker.klang@isil.se - 2016/05/23 12:41

_____

I have installed and configured ARI Slick Galleri in a Joomla 3.5.1 environment. The problem is that no pictures are viewed in the gallery.....

The gallery page are on: http://hprod.shinedata.se/index.php/bildgalleri

_____

Hello,

Set readable permissions for /cache folder and modules/mod_arislickgallery/mod_arislickgallery/js/ folder and all sub-folders.

Regards,
ARI Soft

_____

Hello,

I also installed the Slick Gallery and made one with the Fancybox integration. Pictures are shown correctly but above the photos it says Message: ARI Slick Gallery: "System - ARI Fancybox" plugin isn't installed.
Plugin is activated and has a position. Code in article is {loadposition xxx1}. Picture directory with .csv file (and also .ini file) is included in Smart Content.

I don't know where I have made a mistake. Right now I have only the local installation as I usually add such things to the online version when they work. But if you need to see it online, I can import the actual database in the online version.

Thanks in advance for any help and assistance.

Good night,
Mogwai

_____

Hello,

Currently "ARI Slick Gallery" doesn't support integration with "ARI Smart Content - Fancybox" or "ARI Smart Content - Sexy Lightbox" plugins. "ARI Fancybox" is another our extension and it is not "ARI Smart Content".

Regards,
ARI Soft

_____

Hello,

Ok, I did not realize that. Thanks!
But what about title and description possibilities?

Regards,
Mogwai

Hi,

admin wrote:
Currently "ARI Slick Gallery" doesn't support integration with "ARI Smart Content - Fancybox" or "ARI Smart Content - Sexy Lightbox" plugins. .....

Will it the Sexy Lightbox work in the Slick gallery when I also install that one? Will there be no conflict with the ARI Smart Content?

Regards
Mogwai

_____

A conflict can occur "ARI Sexy Lightbox" and "ARI Smart Content - Sexy Lightbox" are used on the same page.

Regards,
ARI Soft
