
How to show pictures without overlapping?

Posted by nikegirl1979 - 2010/10/07 08:53

hi,

ARI Slick Gallery is really great and looks nice. I loved it on your DEMO site. But when I try to use it, my pictures are displayed on random places (that's okay anyway) and THEY ARE OVERLAPPING or even COVERING each other even though there is enough space left.

How can I avoid this problem?

Thanks a lot,

Andrea

Hello,

Currently the module doesn't provide this ability. It shows images in random place and it can be overlapped.

Regards,
ARI Soft
