
Number of slick gallery modules limited per websit

Posted by maiwenn - 2010/11/21 20:55

Hey

First of all, congratulations for all your modules. I'm using it on several websites and it's amazing, easy to configure, and the effect is so so nice :woohoo: !

I'm using 4 slick galleries on <http://www.daieux-et-dailleurs.fr/fr/photographies> (one per article). But the fourth one doesn't show on the page.

It's a copy of the previous one.. the only difference could be that pictures are small.

Or is the number of slick gallery on the same website limited ?

Thanks for your help

M.

Hello,

We are glad that you like our extension. You can use as many module instances as you wish. The module can't work due to incorrect module settings, if you provide temporary access to your Joomla! backend by email we will investigate this problem.

Regards,
ARI Soft

hum I'm tired I think : there were a nasty code into my loadposition. It's fixed.

Finally that was the occasion to congratulate you :silly: !
