
Ari Orbit Slider - Path is not a folder

Posted by tomwxyz - 2010/10/25 00:19

I have just installed the Ari Orbit Slider on a Joomla-based website and cannot seem to get it to work. It shows up on my front page but doesn't show any images. There is this error message "Jfolder::files:path is not a folder" I have checked and double-checked that the folder exists and there are images present (jpegs).

Any suggestions? Thanks.

Hello,

Could you provide screenshot with module settings or temporary access to your Joomla! backend by email that we can investigate this issue?

Regards,
ARI Soft

Hello,

What version of "ARI Orbit Slider" module you use? Could you send screenshot of module settings page or provide temporary access to your Joomla! backend by email that we can investigate the problem?

Regards,
ARI Soft

I'm using ARI Image Slider and my website page with problem is that:
http://www.pscheidt.arq.br/index.php?option=com_content&view=article&id=56&Itemid=60. I sent a screenshot of module settings in last post.
Thanks
