## Line down middle of content pages

Posted by bubberz - 2011/03/28 03:48

---

Hi!

I have a cover as the first page of my book, and the client is asking if it's possible to add a line down the middle of the subsequent pages.

Would this just be done in the .css?

Thanks!

Hello,

Could you provide sample screenshot where we can see the line should be located?

Hi!

Look at the first instance where there are two page (i.e. page 2 and 3)...I have a line down each now that I put in there with Fireworks. Both pages are images, and I just used the line tool on both sides/pages.

Hello,

This problem with site template styles. Add the next CSS rule to site template CSS file that fix the problem:

```
.ari-flip-book P
{
  margin: 0;
}
```

Hi!

---

I added this to the module css area (within the module parameters) and to the custom.css for the site, and it didn't change anything.

I've cleared the cache several times too.

Any other suggestions?

Thanks!

See how it looks on our side:

<http://www.ari-soft.com/images/fbfiles/images/book.jpg>

Is it correct?

Hi!

The page you have shown below has the lines I used in Fireworks (this was my second post in this topic).

Go to the next page and you'll see what I'm talking about...no middle lines.

Thanks!

Go here:

<http://funphonics.com/index.php/books/the-van>

...and turn the pages...no center line on any page number

---

---

Add the next CSS rule:

```
DIV.b-p2
{
border-left: 1px solid #000;
}
```
