Hello,

Sorry, but the extension can't work in described way. It can show one article on one page only.

Hi
Thank you for your reply!! So is there a way to turn .booklet .b-wrap-right off and only left wrap can come on to the screen, In this way I can show 1 article on 1 page and it will solve my purpose as well.
Thanks

The module doesn't provide this ability, it requires custom modification.
