
Particular Page

Posted by sandeepdo - 2011/06/06 05:31

Hi

I am jsut wondering can we go to a particular page of flipbook, I mean If I want to see article ID 50 in flipbook, I have to click so many time to see the article in flipbook, is this way to go to a particular article in flipbook.
Thanks.

Hello,

Do you want to set start page in module settings?

Hi Thank you for your reply, Yes the thing is I have more than 100 articles to show in flip book, If I modify any, I have to flip so many pages to see my output in flipbook.
Also, if there is way to set start page then please let me know.
Thanks.

Is it suitable if we add new parameter to module settings which will provide ability to define number of start page?

Hello,

this question is actually also very important for me.

Did you implement the option to "jump" to a predefined page ?

As the post starter asked ... i have too many pages .. but if i have a menu-button "50" i would show the book at page 50, and if i would have a menu-button "25" and i would click it the book would be shown directly at page 25.

Hope i could make myself clear ?

best

Hello,

It is possible to define page number which should be shown using hash tag in page URL.
