
Problem with JQuery

Posted by signaal - 2011/06/23 21:41

Install module en plugin, OK! . Created article with the right module Id, OK!. But everytime i turn on JQuery it gives me a blank page with just my email adres?!?!? :(

don't mather if i use the no-conflict option.

If i turn both off, then is see a page, but no flipping option...

Using J1.5.23

Hello,

Try to disable "Content - Email Cloaking" plugin.

Regards,
ARI Soft
