Not seeing article on each page of flipbook
Posted by bubberz - 2011/07/10 02:10

Right now I just have three articles, and the flipbook makes you click the "Next" button three times. Should have the first article as the cover, then articles 2 & 3 show up after first "Next" click:

I am using the same module on a different site, and made sure all the parameters were the same:

Any suggestions?

Thanks!
