
Articles dont get saved

Posted by zahnseide - 2012/01/14 07:32

Hello,

If I edit at the backend the parameters I choose the category and set the article id`s (e.g. 103,104). Than I save it. At the Article, where the Flipbook should appear I put in the code {ariflipbook moduleId=""}. But the content area, where the flipbook should be at the frontend is empty. So I check the modul parameters again, but at the backend the id and category parameters are empty. It seems, that they havenÖ't been saved.

What can I do?

Best regards.

Z.

Hello,

Check that "System - ARI Extensions" plugin is installed and enabled.

Regards,

ARI Soft
