White line appears in centre as page turns

Posted by willmonk - 2012/02/20 09:48

_____

I have just bought and setup Flip Book on a dev site here.

When you hover the mouse between two pages or start scrolling back through the book a white centre line appears momentarily between the pages. It seems to be worse when i view the flip book in Safari or Chrome. (I use Firefox, but it seems to work better in this).

It seems to happen when the page turn effect is activated, but is not an issue when I flip pages forward. (I have tried playing around with css to better align pages, but this has not yet worked)

Can anyone help?

Thank you

Will

_____

Hello,

Try to add the next CSS rules to "CSS Styles" parameter in module settings:

```
.afb-container .ari-flip-book .b-p1,
.afb-container .ari-flip-book .b-p3
{
  margin-left: 2px;
}
```

Regards,
ARI Soft
