change size of the template ?

Posted by emino70 - 2012/03/07 09:53

_____

Hi all, I need to change height and width in the template moleskine but I cant !! I downloaded the psd, created new sized item without change names, and uploaded it. It always shows default theme. Then I downloaded the moleskin from folder in server, renamed in moleskin2 and uploaded again whitout change anything and it NOT works.Always shows default theme. Can you teach me to resize/change background images? many many thanks

_____

Hello,

Could you send folder with new theme(s) which you created and screenshot(s) of module settings page by email?

Regards,
ARI Soft

_____

if you need I will, but the template moleskine works, whit width and height different that wahat I need
If I download it,rename the folder and upload, it doesnt works
I was thinking I simply have to resize background image to let it works
now it works whit default theme.
I only need to resize the moleskine, many many thanks

_____

We have sent a new theme by email.

If you want to create a new theme based on moleskine theme, create a new folder in \modules\mod_ariflipbook\includes\js\themes\ (name of this can't contain numbers) and copy files from "moleskine" folder to created folder. Resize images to necessary size (bg.png, right_bg.jpg and left_bg.jpg), open style.css file and replace "moleskine" prefix in CSS rules to name of created folder. After this set correct size in .ari-fb- CSS rule.

Regards,
ARI Soft

_____

Hello!
I have made a new template only reading your posts! Very compliment! I only have a problem with the margin of the page (on the top). I send a screenshot

Thanks a lot

_____

Hello,

Could you provide a link to a page where we can see the problem? It can be a problem with HTML code for titles.

Regards,
ARI Soft
