## how to remove code from appearing in pages?

Posted by think - 2012/06/14 06:06

---

Hello, I cannot figure out why the code is appearing on the bottom of all pages and also blank page after the last page in a book. link to page is here.

<http://alturl.com/tdb55>

I used both the basic default joomla editors, and took out all the formatting if there was any and saved it so I don't think it is that. I checked in the regular text of the articles to see if by mistake I pasted the code....

```
{ariflipbook moduleId="88"}
```

..by mistake, and no I didn't find it there, only in the first blank article where I have it pasted. I also don't have another other module published such as footer where it appears one of the codes is appearing.

Can someone instruct me what to do in order to have the code removed everywhere, in this case the first page and page after the last page?

I am using latest 2.5.4, and checked that the super user is "no filtering" which I am logged in as.

thanks

=====

Hello,

Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,  
ARI Soft
