
Ari Flipbook

Posted by Akaton - 2012/08/09 21:31

Hello,

I wonder if it was possible to record a source image instead of a source articles.

I fail to see the items in my flip book that is on a specific page. I followed the steps but nothing appears.

Can you give me the procedure to post articles or images in flip book.

thank you.

Aka

Hello,

You can select categories or/and specific articles which you want to load into flip book in module settings. See "Source type -> Articles" parameters section in module settings.

Thank you for your reply, I managed to set up the module. But I see that the source "Articles," the source "image" is not visible.

Can you tell me how to have the type of source-mode images.

thank you

Currently the module can work only with Joomla! articles.
