
Embedding flipbook

Posted by liewald - 2012/09/17 13:42

I've just installed on a joomla 1.5.26.site and I'm trying to embed a flipbook in an article using the plugin.

1. The Plugin is installed and enabled

2. the flipbook is a default book that shows the articles when the module is activated

3 the embed call is {ariflipbook moduleId="21"}

4 if I inspect the resultant page code there is no sign of any output from the plugin and the embed call is not in the output html

Any Ideas?

Hello,

Send screenshot(s) of "ARI Flip Book" module settings page by email and a link to a page where we can see the problem.

Regards,
ARI Soft
