I don\'t get the flipbook working in article

Posted by LianneHolland - 2012/12/28 13:49

Hai,
The module (no position) and the plugin is activated, and in the article I use the syntax {ariflipbook moduleId=""} with the right moduleID. I can't see any output.
Can you help me?
greetings,
Lianne

Hello,

Could you send a link to a page where we can see the problem and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

You still need to choose a module position even if you don't want it to show in a module. Doesn't matter what position. Scroll down to menu assignment. Choose "only on selected pages". Click on each menu tab and choose "clear selections". Next click on the menu your article is listed under. Click the checkbox for the article you put your plugin code in on so that it is the only page the module will show up on.
