
for / back buttons big size

Posted by weltweites - 2013/07/12 07:53

Hello,

i have a questionor maybe an improvement ;-)

There is the possibility for "setting" the for / back -flip buttons

i would like to have them directly next to the pages in the height of the pages ... and the pages are linked to pdf's ... thats why i activated the for/back-buttons.

I hope i could be clear enough with my proposal/question ?

Best Paul

p.s. i tried it with CSS but couldnt get it working :-(

Hello,

Could you send an image where we can see what do you want to achieve?

Regards,
ARI Soft

yes ;-)

is attached at the top left and right are the buttons right ?

I would like to have them from top to bottom next to the pages like i painted it(blue).

Navigation tabs are on your screenshot. They appear when "Enable tabs" parameter is set to "Yes" in module settings. If you want to show navigation arrows, set "Use arrows" parameter to "Yes".

hhmmm i did not explain myself proper i think ...

i would like to get rid of the black top buttons and get some like the blue ones

Since the flipbook is high im looking for a convenient way for the visitor to flip the pages ...

that could be done in a way that the black buttons reach from top to bottom on each side .. so the person can just click easier and deont have to move to the top of the flipbook.

Hope i could make myself more clear as before, sorry for that.

According to our previous post, if you want to remove tabs (black buttons), set "Enable tabs" parameter to "No". Set "Use arrows" parameter to "Yes" to show navigation arrows on places of blue rectangles when a user moves mouse over pages.

Hello,

i still have another question, sorry

Since i have put behind all pages a link to another picture/file the arrow only occurs if im with my mouse over the edge, right ?

So if im viewing it on a mobile platform i dont have a mouse.

Is it possible to view all the time the arrow ?

Thanx for your time and effort

Best Paul

Add the following code to "CSS Styles" parameter in module settings:

`#{$id} .b-arrow DIV`

```
{
opacity: 1 !important;
display: block;
}
```

hhmmm ... i did this :

Module Class Suffix : test

and in my CSS i wrote :

```
#test .b-arrow DIV
{
opacity: 1 !important;
display: block;
}
```

so i assume i did something wrong while its not working correct ?

sorry my mistake !!!!!

i did what you wrote and its now working ... except it doenst load at the start, i have first to swipe over it.

Thanx

ok.... :side: i blmae myself ... sorry

now i found in which CSS styles i had to put it ;-)

thanx now its working like it should be .. thanx 2 u guys !!!

thanx again and sorry for using your time
