Before buying ARI flipbook, I just want to know if this extension is responsive
Many thanks

Hello,

The extension is not responsive, but it is possible to define book width in percent and it will be transformed to absolute value on page load (it will not be changed if browser's window is resized).

He great programmers ;-)

were you thinking about making it maybe responsive in the near future ? I would pay again for this upgrade feature !!

I also think that this would make it an even greater extension as it already is ;-)
