
Flip Book only shows 4 pages and the rest blank.

Posted by syntesys - 2013/10/20 11:25

Hi.

Thanks to you I got the links working but now the flip book only shows a few pages and then show them blank although the link works. I tried starting at a diferent page and it starts at the right page but again only shows a few pages. I googled if it has anything to do with cache sizes in the browser but didn't find anything helpful. Tried 3 browsers - Filezilla, Chrome and Opera.

This is the link to the page

<http://eternalspiritbeauty.net/index.php/en/>

In case you need it this is the csv <http://www.ari-soft.com/images/fbfiles/files/ariflipbook-98866b826014d9f53b7f150dc8026897.txt>

Any help will be appreciated.

Hello,

We see all images, but it requires to wait several seconds when book page is changed. It happens due "lazyload" plugin for images is used on your site. We suppose it is included by your site template.

Regards,
ARI Soft
