
CSV file configuration trouble

Posted by BigHard - 2013/12/17 15:53

Hi,
I've installed flip book module in a client's site, but I'm having trouble with the csv file.
I'm not sure if this is correct, but when I set the csv file with file, title and link, the images should link to the link set in the csv, is this correct?
But in my case that is not happening, it only shows next and previous pages...
The url is <http://www.topmicturismoportugal.com/travel/servicos/inlove-travelling>.

Hello,

Check that "Overlay links" parameter is set to "No" in module settings.

Yes, that was correct, thank you.

Just one more thing, is it possible that the link opens in pop-up?

For example it is possible with help of ARI Sexy Links plugin from ARI Sexy Lightbox package. For this set "Elements CSS selectors" parameter in plugin settings to the following value:

".ari-flip-book-page>A"|width=800&height=600

Hi,

I have another problem, with the csv, I think.

I've created a new book, "Overlinks" is set to "no" and I can't get the image to link...

Could you have a look?

Hello,

CSV file should be located in folder with images.

http://www.topmicturismoportugal.com/travel/images/flippingbook/incentivos_eventos/flip_incentivos_eventos.csv

the filename is different...

The file has incorrect format. Use " instead of " symbol. We can recommend to use OpenOffice application to edit CSV files.

I'm using OpenOffice application... What do you mean by using "instead of"?

The current file is located here,
www.topmicturismoportugal.com/travel/images/flippingbook/incentivos_eventos/flip_incentivos_eventos.csv

That is the file that i've changed....

One more thing, with ARI Sexy Lightbox Lite, it is possible to open the image in pop-up?

No, it is possible with "ARI Sexy Links" plugin from "ARI Sexy Lightbox" package. It is described here.
