
Container isn't shown

Posted by bernd - 2011/01/06 17:19

Well I set up Flip Book within my installation on xampp and everything went fine. When I installed it on my website the container? pictures (left_bg.jpg & right_bg.jpg) aren't shown and the text floats down the page. Any idea?

Thanks in advance!

Bernd

Hello,

Could you provide link where we can see this problem?

Regards,
ARI Soft

If you try to load "ARI Flip Book" with help "Content - ARI Flip Book" plugin into an article and it doesn't appear, provide temporary access to your Joomla! backend by email please that we can investigate this issue.
