## can't get docs viewer to work and strange symbol

Posted by mangus - 2011/11/14 13:41

---

Hi, love the idea of the docs Viewer but i'm having difficulties getting it to work. I have been having two specific issues:  
1 - when i insert the code "{aridoc engine="google" width="600" height="300"}http://www.saladeaula.org/pdf/dren.pdf{/aridoc}" I get the first problem displayed in the picture.

2- It always appears a "" after the code

<http://www.ari-soft.com/images/fbfiles/images/help.PNG>

Can anyone help me solve these problems?

Thanks, solved the second problem, but regarding the first one, which is the gravest, is there something i can do to give it permission?

Selected PDF document is not available. For example try to open link to the document into a browser, 404 HTTP error occurs.
