can\'t get docs viewer to work and strange symbol Posted by mangus - 2011/11/14 13:41
Hi, love the idea of the docs Viewer but i'm having dificulties getting it to work. I have been having two specific issues: 1 - when i insert the code "{aridoc engine="google" width="600" height="300"}http://www.saladeaula.org/pdf/dren.pdf{/aridoc}" I get the first problem displayed in the picture.
2- It always appears a """ after the code
http://www.ari-soft.com/images/fbfiles/images/help.PNG Can anyone help me solve these problems?

Selected PDF document is not available. For example try to open link to the document into a browser, 404 HTTP error occurs.
