## My Spreadsheets aren't updating

Posted by txbva - 2012/05/02 14:37

---

First off, I really like this better than most google doc viewers. :)

So I'm running Joomla 2.5.4 and I've got everything to work. I copied all of my Excel documents to a folder on my site and point to them. The viewer comes up perfectly, just the way I wanted. Thank you!

The only problem that I'm having is when I update the excel spreadsheets and re-upload them, I don't see the changes on the website. Am I missing something?

<http://www.txbva.com/league-schedule.html>

thanks in advance for your help! :)

Hello,

Download and upgrade "ARI Doc Viewer" plugin after this add cache="0" parameter to {aridoc} tag.

Regards,  
ARI Soft

LOL!! Okay, thanks. I will download it again.

By the way, I added the cache="0" and it seemed to have work, but I'm still going to download the latest.

I assume, I can just download and install over the current version?
