Unable to find the document

Posted by bobgen - 2012/10/19 23:25

_____

Hi, I', new with ADW, and I have problem with display doc file. I made article in which I have only one next line:

{aridoc engine="google" width="960" height="700"}documents/test.doc{/aridoc}

Of course I have on root of Joomla folder documents and inside file test.doc. But, When try to call that documents fro menu I get next message:

Sorry, we were unable to find the document at the original source. Verify that the document still exists.
You can also try to download the original document by clicking here.

When I press link next I gen next message:

Not Found
The requested URL /documents/test.doc was not found on this server.
Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.

What can be wrong?

Thanks in advance.

_____

Hello,

Where we can see the problem?

Regards,
ARI Soft
