
Button or other way to auto add the code to embed

Posted by esljesse - 2013/02/15 08:42

Hi all,

Is there any way to automatically have the files users upload as attachments automatically be embedded in the item (using K2)?

I saw someone mentioned the idea of a button in the editor a long time ago, but there was never a reply.

Any help would be greatly appreciated.

This is the old post I mentioned:

TOPIC: Feature for Docs Viewer

Feature for Docs Viewer 1 Year, 8 Months ago Karma: 0

Hi everyone.

Sorry to post here but there's no section for requested features for Docs Viewer.

One function being useful could be to add an Edit Button in editor, to simply add the correct code in an article, to embed docs

Thank you for considering this request.

Hello,

The plugin doesn't provide ability to embed uploaded files automatically.

Regards,
ARI Soft
