Ari Docs Viewer conflicting with Widgetkit g

Posted by joelboggis - 2013/02/25 17:53

_____

Hi I have been using the Ari Docs Viewer all over my site, its great!! But this is the first time i want to use it on the same page as an article that has a widgetkit gallery running. If i add the ari doc article all my galleries on that page stop working.

Is there anything you can do please?

Thanks Joel

Hello,

Where we can see the problem?

Regards,
ARI Soft

Hi i worked out it was a jquery conflict trying to load multiple times.

But I have noticed that im getting the message:

You've reached the bandwidth limit for viewing or downloading files that aren't in Google Docs format. Please try again later.

I dont get it every time but very frequently, my site is a school site and has many pdfs in a newsletter page. I have used the roksproket tabs extension to let the user flick between the 6 newest letters (pdfs) - could this be a reason for the above message? or do you know of others?

site: http://www.stpeters.herts.sch.uk/index.php?option=com_content&view=article&id=95&Itemid=511

Thanks Joel

Hello,

It seems a bandwidth limit which is provided by Google is exhausted. You can read about similar problem here.
