# Ordering defaults to top

Posted by eclectic - 2013/05/30 17:50

_____

I'm using a document set as featured for the home page.  I have it set to be in 4th place, yet it always displays as the 1st.  Is this a bug?  My doc string is:

{aridoc engine="google" width="600" height="400"}images/slides/SAM-NH_ThankYou.pptx{/aridoc}

UPDATE:

I created a custom HTML module and it is now positioned properly.
