Hia!

I have been using your excellent plugging for quite some time now.

But all of a sudden the pdf's arent shown when i use google engine. Only ifram works atm.

Working ex. iframe:

<http://l25.lmadata.dk/index.php/component/k2/item/186-erholm-gods>

Not working ex. google:

<http://l25.lmadata.dk/index.php/gardbeskrivelser/item/179-agro-vest>

As you can see the loading anim appears very briefly and then nothing else.

Any help or insight would be greatly appreciated.

Hello,

We can't reproduce the problem:

Hmm seems to be periodic. Works for me now as well.
