Hello,

Not direct links to files are used. These links to viewers of "Google Docs" and "DropBox" services.

So, in this case Ari Docs Viewer is not a solution for Google Drive and Dropbox .pdfs?

Use direct links to files. For example use the following link for your document in DropBox:

https://dl.dropboxusercontent.com/s/f04biq71kvl1eox/CPSF_0001.pdf

Yes, now is working. Could be cool if someone point/tip us how to get a direct link for Google Drive and Dropbox.
Thank You.

This information is available in documentation for DropBox / "Google Docs". For example for DropBox it is available [here](#).
