ARI Docs Viewer Plugin

Posted by marg - 2014/03/20 16:29

Hello!

In a situation when a PDF-file size reaches 25 mb, a message appears about impossibility of viewing document and offers a link for downloading the file.

1. Is it possible to disable the appearance of a download link in this case? (Values: 0 in a parameter "showDownloadLink" changes nothing).
2. Is it possible to disable a top right button "Download original" when pdf set to the full screen?
3. Is it possible to disable a top right button "Add to Disk" when pdf set to the full screen?
4. Is it possible to disable a button "Download original" in a menu "File" -> "Download original"?

The main problem is how to remove all the buttons for downloading?

Hello,

1. It is not possible because this is limitation of "Google Docs" service.

2, 3, 4. "Google Docs" API doesn't provide these abilities.

Regards,
ARI Soft
