
It is not working with pps file

Posted by mbolanosd - 2014/03/25 14:25

Aridoc viewer is not displaying properly the pps file.

Using: {aridoc engine="google" width="600" height="450"}presentaciones/Desprendimientos Empresariales.pps{/aridoc}

at: <http://www.cidce.net/index.php/es/cidce>

It just shows characters like: Ÿ °...Â± ±> Îý Í ÎýýýÎýýýÇ È É Ê Ë Ì ýýýý

Need to resolve this.

Hello,

It seems file is saved in format which are not supported by "Google Docs" service. Try to save the file for a previous version of PowerPoint.

Regards,
ARI Soft

It is in version 97-2003, which is the older slide show version.

It still doesn't work.

It doesn't work because "Google Docs" service doesn't support format of your file.

I changed it to a pdf file and it works, but it doesn't work with a pps fiel.

Gess I have to change all pps files to pdf.
