
ARI Docs Viewer not displaying .pptx properly

Posted by bheckmann - 2014/04/15 04:00

Hi,

I'm new to Joomla and ARI Docs so lots to learn. I've embedded a .pptx file in a Joomla article per the instructions (the file is hosted on the Joomla server) but it displays in unreadable characters. I used this code in the article:

```
{aridoc engine="google" width="1024" height="768"}/docs/XXX_Sales_Training_april_2014.pptx{/aridoc}
```

screen shot of the page is attached.

Many thanks in advance for any assistance.

Best,
Bob http://www.ari-soft.com/images/fbfiles/images/ppt_file.jpg

Hello,

PowerPoint files are handled by Google Docs service and it seems the service doesn't format of your file.

Regards,
ARI Soft

Does that mean I'm just out of luck, or what options can I pursue?

Thanks,
Bob
