
Unable to view Excel spreadsheet

Posted by A. Wayne Webb - 2014/06/23 11:27

Here is a link to the page in question. Even when I click on the arrow in the upper right corner the viewer does not show the file. I can download and open the file. The linked file is 2.8Mb.

Any thoughts?

Hello,

We can't open the page. 403 error occurs.

Foisted by my own security measures. Let me turn them off momentarily...

Give that a shot.

It seems it takes a long time to download your document by Google Docs service or it can't download it due to your security restrictions. You can try to upload your file to files sharing service like DropBox.

It is not my security measure as I turned that off. Therefore it must be Google's Doc viewer taking too long.

Thank you for your efforts and I will try some other viewer. Or, I will turn the file into a HTML file.
