
Google Docs PDF Links

Posted by mdemop - 2014/09/29 23:19

Hello,

Internal links in PDFs are not working when using the Google Docs viewer on Joomla 3.3.4. We need these internal links to work while using the Google Docs viewer. We would even be willing to get a quote on how to make a workaround and pay for it if needed.

Hello,

Google Docs Viewer API doesn't support ability to control internal links. It is only accept path to a PDF document which should be shown.

Regards,
ARI Soft
