Hey,  
i have followed the posts for above problem..but unable to fix it.  
could u pls help me.  
am using aridocs viewer in joomla installed in local machine.

Hello,

A document should be available via the Internet because Google Docs is an online service and should have access to document. "localhost" is not available outside your machine.

Upload your site to a public server or configure access to site on your local machine via a service like "DynDNS".
