Posted by mifk - 2015/05/20 05:13

I have created a test site. His address: <http://test1.denta-servis.com>

The plugin is on the page:

<http://test1.denta-servis.com/index.php/o-nas/rezhim-raboty-2>

Works well

On the main page there was a problem.

The problem is only on the main page, on other pages there.
