
file is being download instead of display

Posted by khlihs - 2015/06/26 15:25

I set to view the pptx with iframe. But when I open the article, file is downloaded instead of get viewed.
What can I set to file is view?
Here the code

```
{aridoc} images/guatemala15/docs/Intro-to-guatemala.pptx{/aridoc}
```

thanks

Hello,

If a document is loaded into , an appropriate browser's addon for this document type should be installed in client's browser otherwise a browser will offer to download the file.

Regards,
ARI Soft
