Hello,  
French user I'm not the first to encounter that error but didn't find a solution.  
Under Joomla 3 I installed your Ari Docs viewer plugin.  
In an article I inserted the following code  
{aridoc engine="google" width="600"  
height="1200"}http://pep83.org/images/pep2016/mayotte/OP\_PEP\_MAYOTTE.pdf{/aridoc}  
And I have no display of that file and the message you can see on the screenshot joined  
Thanks for your help

It seems the PDF file is corrupted. It is not possible to open it in Viewer on Mac OS and with internal viewer in Firefox browser.
