
Docs Viewer as a filpbook

Posted by palandre - 2016/07/04 11:04

Hi,

I have the following goal: upload a PDF file and show it as a filpbook inside Joomla page.

Is any way to achieve this as using your Docs Viewer.

I know that you have a dedicated module for Flipping Book, but I don't have to create a PDF book; I already have it and I have simply to show it as a flipping book.

Thanks in advance,
Andrea

Hello,

ARI Smart Book can create books from PDF files.

Regards,
ARI Soft
