
Documents not loading

Posted by aukevann - 2017/10/23 18:26

Hi,

I like using AriDocs, however I have troubles with the documents loading. Small documents always seem to load if there is just one on the page. But when I have larger documents they sometimes load and sometimes not. I have to refresh the page frequently. If I put multiple documents on a page than sometimes none of them load.

I work on a dedicated server and fast Inet so that can't be the problem.

Anything I can do to optimize loading?

Kind regards,
Auke

Hello,

What viewer do you use (Google Viewer, PDFJS, MS Office)?

Google Viewer, but I tried others and it does not make much difference.

If you need it for PDF documents then PDFJS viewer can be used. It loads viewer from your site. Google Viewer and MS Office Viewer are 3rd party services and they have some limitations on number of parsed documents in hour/day.

Just looked and did not realize it, but I am using PDF JS now. So this does not solve the problem. Anything else that may help?

Kind regards,
Auke

It seems this is some limit from Google Docs service. Try to load one document per page.

Re:Documents not loading

Posted by aukevann - 2017/10/26 19:37

I need multiple docs on a page so that is no option.
But the problem occurs with all viewers, not only with Google docs.

Kind regards,
Auke

If you want to show several documents on one page, a possible solution is modify the plugin and show a document name. Document will be loaded dynamically when a user clicks by name.

I am using yours because it works different from the others ;-)

Cheers,
Auke
