## Trying to hide nav buttons but they still show

Posted by svandyke - 2014/05/12 22:26

---

LAST PDF ISSUE SOLVED (i didn't see anyplace to hit "solved")

1 - Trying to hide nav buttons but they still show. Here is what I set in template / book settings but the nav buttons stay on

Show 'Next & Prev' buttons

'Next & Prev' show mode

2 - Also, my menu is acting weird when ARI Smart Book is used (see image)

3 - Is there a way to print the final book?

Thank you so much, it is a "mighty" tool! :) <http://www.ari-soft.com/images/fbfiles/images/AriMenuConflict.png>

Hello,

1. "Books settings -> Navigation buttons" parameters section is used to manager navigation buttons at left and right sides around a book. If you want to remove navigation buttons from toolbar, add the following code to "Styles settings -> Custom styles" parameter:

```
.{ $theme } .smartbook-icon-prev,  
. { $theme } .smartbook-icon-next {  
    display: none !important;  
}
```

We will add a new parameters section to manager buttons in toolbar in a future version of the extension.

2. Could you provide a link to a page where we can see the problem? It can be a javascript conflict.

3. Currently it is not possible, but we are working on it and this functionality will be available soon.

Regards,  
ARI Soft

The style copy paste did not work :( still see the nav buttons

here is the page address that shows that issue as well as the menu issue above it

About nav buttons, try to clean browser's cache.

Upgrade the component to v. 1.2.2. It should resolve the problem with the menu. It occurs due to conflict with MooTools library.

<http://oakschristianschool.org/index.php/homepage/thursday-test>

"publication doesn't contain pages"

see image

sooooo close! :) [http://www.ari-soft.com/images/fbfiles/images/ari\\_error.png](http://www.ari-soft.com/images/fbfiles/images/ari_error.png)

---

Your publication doesn't contain pages. See parameters on "Pages source" tab in book settings. Something is configured wrong.

PS: If can't find an error, send the screenshot of "Pages source" tab by email so we can investigate the problem in more details.

## \ "publication doesn't contain any pages\"

Posted by svandyke - 2014/05/13 21:46

---

I have to go back and "push" almost every setting (basically deleting and recreating the same book) to get it back up.

<http://oakschristianschool.org/index.php/homepage/thursday-test>

I tried attached 2 screen shots the first shows the page source settings and the 2nd shows that there are 2 pages in the book...it did not allow the 2nd image

All is published and correct as far as I can see [http://www.ari-soft.com/images/fbfiles/images/error\\_shot\\_1.png](http://www.ari-soft.com/images/fbfiles/images/error_shot_1.png)

Check that "Thursday Notes" content category contains articles and they are not "Featured" articles (because "Exclude frontend articles" parameter is set "Yes").

If it doesn't help, could you provide a temporary access to your Joomla! backend by email so we can investigate the problem in more details?
