Ari Smart Book error after updating Joomla
Posted by cristiete - 2014/06/17 10:30
_____

Hi, the Smart Book component has a fatal error after I updated Joomla From 3.1.5 to 3.2.4.

This error is:

Fatal error: Declaration of AriSmartBookTableCategory::load() must be compatible with JTableInterface::load($keys = NULL, $reset = true) in /var/www/html/bitspec/administrator/components/com_arismartbook/tables/category.php on line 18

I uninstalled the component and I installed it again. Same error

Anyone has same issue?
Thank you,
Cristi Etegan http://www.ari-soft.com/images/fbfiles/files/www.zip

Hello,

Check that you use the latest version of the extension (v. 1.3.0).

Regards,
ARI Soft

Thank you. The new version let me use the component.
But, on the first Smartbook, I used several images (800x600) as source pages.
I made a module with a link to display the flipbook, but the ressult is not readable. I only see corectly the smartbook in fullpage mode.

here is the link
http://feaa.ucv.ro/bitspec/index.php?option=com_arismartbook&view=book&bookId=2&Itemid=1276

Thank you,
Cristi Etegan

It seems this is a problem with cache which is used by your site template. Try to clean Joomla! cache, if it doesn't help, could you provide a temporary access to your J! backend by email so we can investigate the problem in more details?

Regards,
ARI Soft

_____

Hi, I've resolved with cache. This site is used for testing only, the main site is http://www.bitspec.com, so, if you still want the access to admin part is ok, but you have to tell me all the changes you will do, because on the live site I have to re-make them.

Here is the Smartbook link:

http://feaa.ucv.ro/bitspec/index.php?option=com_arismartbook&view=book&bookId=2&Itemid=1269

So, I've observed a strange behaviour of the flipbook.
In Mozilla, when I use Inspect element function, I notice a huge height of my flipbook

```
element {
    position: absolute;
    overflow: visible;
    perspective-origin: 0% 50%;
    z-index: 0;
    display: none;
    width: 458px;
    height: 16376px;
    top: 0px;
    right: 0px;
    left: auto;
}
```

The images are 600 x 800 (H x W), I thought that in image mode the scalling is done by default to make the smartbook readable.

Could you help me?

_____

Solved. The changes were in template settings.
