
Making first Smartbook presentation

Posted by Nokhart - 2014/06/23 08:05

Hi, can you tell me how I get the images into smartbook. I understand that this controlled in the Page source flip. However, I do not understand how to upload the images. In my description file it says by default - smartbook.csv. There is now upload function that I can see. Pls assist. Regards :blush:

Hello,

If you want to create a book based on images from folder(s) on your server, set "Pages are created from" parameter to "Images" when create a book and enter path(s) to folder(s) with images in "Page source -> Directories" parameter in book settings.

Images can be uploaded via Joomla! media manager. For this open "Content -> Media Manager" page on Joomla! backend. We will add ability to upload images directly into the component in a future version.

If you have any questions about the extension or need more assistance, let us know.

Regards,
ARI Soft

Posted by Nokhart - 2014/06/23 09:06

Hi again - still do not see any presentation, but I put in the path;
/home/1/b/bpopartner/www/images/com_arismartbook/pdf_import/Presentasjon_107_b to the folder for the images in Joomla Media Manager. I can see the images is there. Do I need other specification than that?

I guess I alos have to include this in a Joomla ArticeI - how do I do that.

Regards

=====

Re:Making first Smartbook presentation

Posted by admin - 2014/06/23 09:14

Hello,

Set "Page source -> Directories" parameter to the following value:

images/com_arismartbook/pdf_import/Presentasjon_107_b

It is possible to create a link to a book in Joomla! menu manager, for this choose "ARI Smart Book -> Book" menu item type or if you want to load a book into an article, use "System - ARI Smart Book" plugin. You can read about the plugin [here](#).

Style parameters like width, height, font and etc. are configured in template settings. Open "ARI Smart Book -> Templates" page and choose template which is used in your book. BTW, documentation for the extension is available [here](#).

Hello

I was just downloading the ari smart book component.

But now I have a problem with the upload of my PDF document which i want to transfer into images.

I tried several times and I always had the problem which you can see on the screenshot.

Can you help me out? :)

Thx in advance!

Hello,

Contact you hosting support and ask installed or not "GhostScript" on your hosting and if it is installed, path to it.

Regards,
ARI Soft

Re:Making first Smartbook presentation

Posted by yannicklo - 2014/08/06 21:38

Thank you for your quick answer.

Ok, unfortunately I think I can't contact my Hosting Support until tomorrow morning..

Just in case that there is no Ghostscript installed, what other options do i have? I use the Joomla 3.3 CMS.

Best regards

Yannick

Ghostscript is required if you want to convert PDF files to images. Usually it is installed on popular hosting services like Bluehost, Hostmonster and etc.

Hello

I was speaking with my hooster and he told me that Ghostscript isn't installed and he isn't shure that its possible to install..

Isn't there an other possibility to load it up image by image?? i have got already the images and so on..!?!

i really don't know what to do next, please help me!! :)

Re:Making first Smartbook presentation

Posted by admin - 2014/08/07 09:24

If you want to create a book based on images from folder(s) on your server, open "ARI Smart Book -> Books" page, click by "New" button and set "Pages are created from" parameter to "Images" then enter path(s) to folder(s) with images in "Pages source -> Directories" parameter. For example if images are located in /images/book1 folder, populate "Directories" parameter with the following value:

images/book1

BTW, documentation for the extension is available here. "Quick start" is described here.

Thank you for your quick answer.

Problem solved!! :)

One little question more. Is it possible to put some soundeffects while the page is turning?

=====

Re:Making first Smartbook presentation

Posted by admin - 2014/08/07 11:57

The extension doesn't support ability to play a sound when page is turned, but we can implement it as a custom development.
